

High Efficiency Fully Automated Digital Radiography System for Casting Inspection

APPLICATIONS

- ▶ Stationary system for castings X-ray inspections
- ▶ High speed routine work for quality control of aerospace parts or structures on the 65 cm diameter turn table
- ▶ Castings, weldings, composite materials

KEY FEATURES

- ▶ **Dxbox-320-C5** is a revolutionary system designed with **radio-transparent turning table** so that X-ray parts can be inspected in any direction, even through the turn table. Handling and positioning the parts manually is no more needed..
- ▶ **Dxbox-320-C5** is unique in the world and is particularly important for applications where the complexity of the parts is such that they must be X-rayed in **many different angles** to achieve all requested norms.

ALL-ANGLE C-ARM & MUCH MORE

CONTROL TOUCH SCREEN

An intuitive HMI design offers a live 3D position next to the door. Operator can easily control the axis

MAESTRO

The User-Friendly software for control of generator, flat panel detector and axis. As for image grabber and treatment

SAFETY BARRIER

Prevent someone to enter the system while it's in motion.

4 CONTROL CAMERAS

The operator can visualize the current position of the axis and adjust their position

NORMS COMPLIANCE

In accordance with all control required standards
