

DIGIMAG2

Mobile MPI Inspection Solution

The DIGIMAG2 is a portable MPI solution, contained in a wheeled pelicase, meaning it can be used anywhere there is access to a standard 240V mains output. Ideal for parts that may be too heavy to be used on a bench or for those that have a complex geometry.

The supplied 5m cable, which acts as a coil would on a bench, is wrapped around the part to be inspected, giving a strong output, reaching around 900A RMS.

To be used with MPI Inks and UV Light.

Key Features

- Capable of AC, HWDC, Demag for both, has a selection of shot times.
- Reaches 900 A RMS.
- Joystick control for operational settings.
- Available in a 110V version upon request.

DIGIMAG2 Specification

Principle Of Operation	MPI
Cable Length	5 metres (16.4ft). Custom lengths are available on request.
Cable Type	Standard welding cable 120mm ² and uses
Cable Connectors	Standard Dinse connectors
Weight	40kg (not including cables)
Pellicase Dimensions	625 x 500 x 366 mm (24.5 x 19.7 x 14.5 in)
